k-adic Collatz Constellations:
Prime-Preserving *k*-adic Collatz Chains on a Logarithmic Spiral

March 10, 2026 — Hiroshi Harada

Logarithmic Spiral Mapping: *radius* $r = \ln(n)$, $\theta = 2\pi \ln(n)$, $\Delta\theta \approx 2\pi \ln(a)$

k-adic Collatz-type Map: $F(n) = ((k + 1)n + b) / k$ *(b is chosen according to n mod k)*

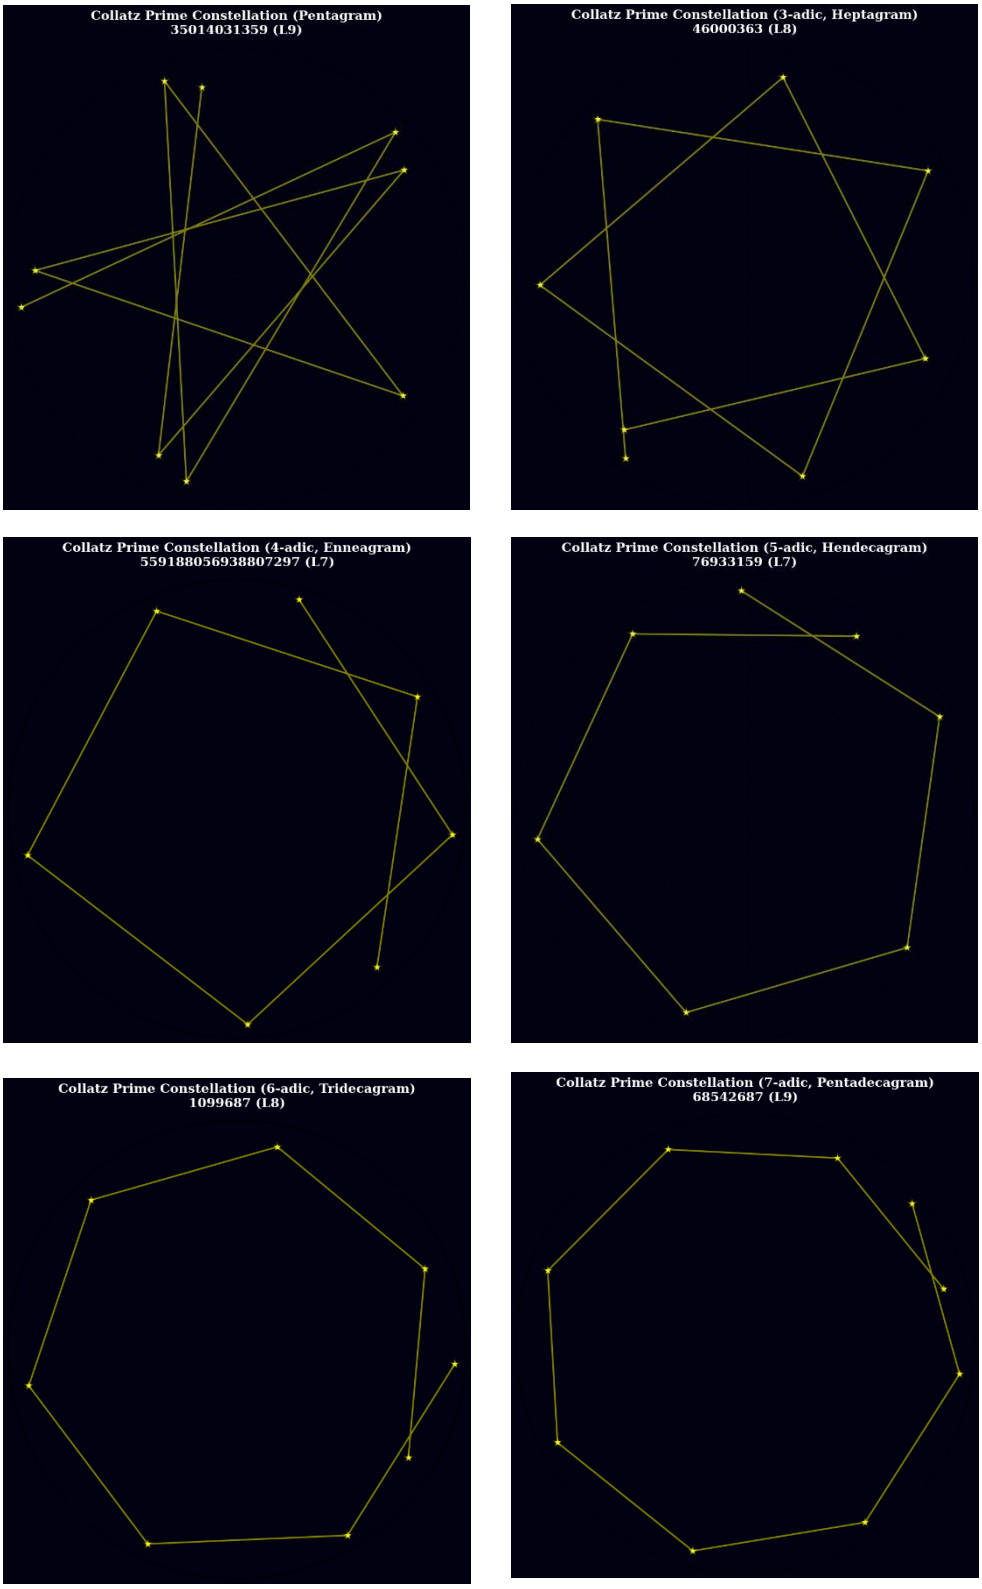

Figure 1. *k*-adic Collatz Prime Chain Constellations.
